MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS 2200 MILL ROAD ALEXANDRIA, VA 22314-4677 (703) 838-1792

TONNAGE INDEX DECREASES IN SEPTEMBER

The adjusted monthly truck tonnage index fell 6.3 points in September 1991 from August 1991 according to the ATA Truck Tonnage Index. At a level of 186.3(p) with 1967 = 100, the September tonnage index is 3.3% below August's 192.6(r). The current month's adjusted index is 12.1 points (6.9 percent) above the year-ago level in September 1990.

The actual tons reported by motor carriers in the ATA survey increased 0.2% from 5.03 million tons in August to 5.04 million tons in September 1991. Adjustments for variations due to seasonality and the number of working (trading) days decreased the September index level to 186.3(p).

From August 1991, to September 1991, the Industrial Production index increased 0.1% compared to the adjusted general freight tonnage index decrease of 3.3%.

These findings were announced today by the American Trucking Associations (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the company-wide operations of motor carriers of general freight.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.
